

Get better performance from every PC voice application.

Your computer's built-in Bluetooth can't give you the wideband audio voice-driven applications need. But with VXi's BT2 Bluetooth Adapter, you can easily connect your Bluetooth headset to your PC or Mac, and enjoy full-range audio quality for significantly better VoIP, speech recognition and Unified Communications performance.

Benefits

- Get better results from any voice application.
- Set up easily—just plug into your computer's USB port.
- Connect your Bluetooth headset to your cell phone and PC at once.
- Stream high-quality audio from your computer.
- Use with any VXi Bluetooth headset.

Product Highlights

- Wideband audio upgrades softphone, speech recognition, UC, etc.
- Pairs automatically with your Bluetooth headset for true plug-and-play ease of use.
- Works with any VXi Bluetooth headset.
- With a multipoint headset, you can connect to two Bluetooth-enabled devices simultaneously.
- A2DP support for high-quality music streaming.
