

## FIP12WP Hardware Differences

### Overview

The FIP12WP has three different hardware versions (V1, V2, and V3), each using distinct software. To prevent user confusion, we have outlined the differences between the hardware versions, along with their corresponding software and product specifications.

### Differences

Model	Hardware Version	Software Version (Latest)	Flash	USB Port
FIP12WP	V1	FVUI12_V0.5.42_202209091001_T.bin (Discontinued)	16Mbps	No
FIP12WP	V2	FVUI12WP_7628_V0.7.72.2_202402011657_T.bin (Discontinued)	32Mbps	No
FIP12WP	V3 V1.1.0.1.4.1.7	FVUIADV_7628_V0.11.6_RC.bin (Refer to <a href="http://www.flyingvoice.com">www.flyingvoice.com</a> )	32Mbps	Yes

FIP12WP from SN number **FLY6523C000001** (after December 2023) support USB interface. Also, the phone uses a software version that starts with FVUIADV\_7628\_V0.X.X .

#### TIPS :

You can check if the SN number matches the support via the Label on the back of the IP Phone or the web interface.
